LINCOLN EDUCATIONAL SERVICES CORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2009 AND 2008
(In thousands, except share and per share amounts and unless otherwise stated)
(Unaudited)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business Activities – Lincoln Educational Services Corporation and subsidiaries (the "Company") is a diversified provider of career-oriented post-secondary education. The Company offers recent high school graduates and working adults degree and diploma programs in five principal areas of study: automotive technology, health sciences, skilled trades, business and information technology and hospitality services. The Company currently has 43 schools in 17 states across the United States.

Basis of Presentation – The accompanying unaudited condensed consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission and in accordance with accounting principles generally accepted in the United States of America ("GAAP"). Certain information and footnote disclosures normally included in annual financial statements have been omitted or condensed pursuant to such regulations. These statements which should be read in conjunction with the December 31, 2008 consolidated financial statements of the Company reflect all adjustments, consisting solely of normal recurring adjustments necessary to present fairly the consolidated financial position, results of operations, and cash flows for such periods. The results of operations for the three months and nine months ended September 30, 2009 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2009.

The unaudited condensed consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany accounts and transactions have been eliminated.

Use of Estimates in the Preparation of Financial Statements – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. On an ongoing basis, the Company evaluates the estimates and assumptions, including those related to revenue recognition, bad debts, fixed assets, goodwill and other intangible assets, stock-based compensation, income taxes, benefit plans and certain accruals. Actual results could differ from those estimates.

Stock Based Compensation –The accompanying condensed consolidated statements of operations include compensation expense of approximately $0.5 million and $0.6 million for the three months ended September 30, 2009 and 2008, respectively, and $1.5 million and $1.8 million for the nine months ended September 30, 2009 and 2008, respectively. The Company uses the Black-Scholes valuation model and utilizes straight-line amortization of compensation expense over the requisite service period of the grant. The Company makes an estimate of expected forfeitures at the time options are granted.

2. WEIGHTED AVERAGE COMMON SHARES

The weighted average number of common shares used to compute basic and diluted income per share for the three and nine months ended September 30, 2009 and 2008, respectively, was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Basic shares outstanding	26,590,492	25,087,946	26,260,511	25,361,821
Dilutive effect of stock options	780,278	721,765	752,742	677,530
Diluted shares outstanding	27,370,770	25,809,711	27,013,253	26,039,351

For the three months ended September 30, 2009 and 2008, options to acquire 79,500 and 546,708 shares, respectively, and for the nine months ended September 30, 2009 and 2008, options to acquire 112,500 and 546,708 shares, respectively, were excluded from the above table as the effect of their inclusion on reported earnings per share would have been antidilutive.

3. BUSINESS ACQUISITIONS

On January 20, 2009, the Company completed the acquisition of six of the seven schools comprising Baran Institute of Technology, Inc. ("BAR"), for approximately $24.9 million in cash, net of cash acquired, subject to further post closing adjustments. BAR consists of seven schools serving approximately 2,700 students as of September 30, 2009 and offers associate and diploma programs in the fields of automotive, skilled trades, health sciences and culinary arts. On April 20, 2009, the Company acquired the seventh BAR school, Clemens College ("Clemens"), for $2.7 million, in cash, net of cash acquired. In connection with these acquisitions, the Company incurred approximately $1.3 million of transaction expenses for the nine months ended September 30, 2009.

On December 1, 2008, the Company acquired all of the rights, title and interest in the assets of Briarwood College ("BRI") for approximately $10.6 million, net of cash acquired. BRI is regionally accredited by the New England Association of Schools and Colleges, and currently offers two bachelor degree programs to approximately 700 students as of September 30, 2009 from Connecticut and surrounding states.

The consolidated financial statements include the results of operations from the respective acquisition dates. The purchase price allocation for BRI was finalized on June 30, 2009. With respect to BAR and Clemens acquisitions the purchase prices have been preliminarily allocated to identifiable net assets with the excess of the purchase price over the estimated fair value of the net assets acquired recorded as goodwill. The allocation may be revised when the Company receives final information including appraisals, valuations, settlement of purchase price and other analyses related to certain intangible assets.

The following table summarizes the reported fair value of assets acquired and liabilities assumed related to acquisitions:

	BAR January 20, 2009 and Clemens April 20, 2009	BRI December 1, 2008
Restricted cash	$ 362	$ -
Current assets, excluding cash acquired (1)	8,126	195

Long-term liabilities assumed	(27,450)	(816)
Cost of acquisition, net of cash acquired	$ 27,552	$ 10,568

(1) Current assets, excluding cash acquired for BAR includes reported amounts due from the seller in accordance with the stock purchase agreement.

4. GOODWILL AND OTHER INTANGIBLE ASSETS

The Company reviews intangible assets for impairment when indicators of impairment exist. Annually, or more frequently, if necessary, the Company evaluates goodwill for impairment, with any resulting impairment reflected as an operating expense.

Changes in the carrying amount of goodwill from December 31, 2008 through September 30, 2009 are as follows:

Goodwill balance as of December 31, 2008	$ 91,460
Goodwill adjustments (1)	1,246
Goodwill acquired pursuant to business acquisition-BAR	19,267
Goodwill balance as of September 30, 2009	$ 111,973

(1) Goodwill adjustments are related to the finalization of the purchase price of BRI.

Intangible assets, which are included in other assets in the accompanying condensed consolidated balance sheets, consist of the following:

	Student Contracts	Trade Name	Trade Name	Accreditation	Curriculum	Non-compete	Total
Gross carrying amount at December 31, 2008	$ 2,563	$ 1,270	$ -	$ 1,307	$ 2,000	$ 201	$ 7,341

Weighted average amortization period (years)	2	Indefinite	6	Indefinite	10	3	

(1) The acquisitions related to the acquisitions of six of the BAR schools on January 20, 2009 and Clemens on April 20, 2009
(2) The adjustments are related to the finalization of the purchase price of BRI.
(3) During the second quarter of 2009, the Company wrote-off the value of the trade name of Florida Culinary Institute in West Palm Beach, Florida due to rebranding.

Amortization of intangible assets was approximately $0.6 million and $27 thousand for the three months ended September 30, 2009 and 2008, respectively, and $1.8 million and $86 thousand for the nine months ended September 30, 2009 and 2008, respectively.

The following table summarizes the estimated future amortization expense:

Year Ending December 31,	
Remaining of 2009	$ 642
2010	1,894
2011	883
2012	232
2013	181
Thereafter	391
	$ 4,223

5. LONG-TERM DEBT AND LEASE OBLIGATIONS

Long-term debt and lease obligations consist of the following:

	September 30, 2009	December 31, 2008
Credit agreement (a)	$ -	$ -
Finance obligation (b)	9,672	9,672
Note payable	43	-
Capital lease-property (with a rate of 8.0%) (c)	27,260	-
Capital leases-equipment (with a rate of 8.5%)	403	502
	37,378	10,174
Less current maturities	(391)	(130)
	$ 36,987	$ 10,044

(a) The Company has a credit agreement with a syndicate of banks which terminates on February 15, 2010. Under the terms of the credit agreement, the syndicate provided the Company with a $100 million credit facility. The credit agreement permits the issuance of up to $20 million in letters of credit, the amount of which reduces the availability of permitted borrowings under the agreement. At the time of entering into the credit agreement, the Company incurred approximately $0.8 million of deferred finance charges. At September 30, 2009, the Company had outstanding letters of credit aggregating $5.6 million which were primarily comprised of letters of credit for the Department of Education and real estate leases.

The obligations of the Company under the credit agreement are secured by a lien on substantially all of the assets of the Company and its subsidiaries and any assets that it or its subsidiaries may acquire in the future, including a pledge of substantially all of the subsidiaries' common stock. Outstanding borrowings bear interest at the rate of adjusted LIBOR, as defined, plus 1.0% to 1.75% or a base rate (as defined in the credit agreement). In addition to paying interest on outstanding principal under the credit agreement, the Company and its subsidiaries are required to pay a commitment fee to the lender with respect to the unused amounts available under the credit agreement at a rate equal to 0.25% to 0.40% per year, as defined.

As of September 30, 2009 and December 31, 2008, the Company had no amounts outstanding under its credit agreement. During the nine months ended September 30, 2009, the Company borrowed a total of $44.0 million and repaid $44.0 million under its credit agreement. Interest rates on borrowing under the credit agreement during the nine months ended September 30, 2009 ranged from 1.32% to 3.25%.

The credit agreement contains various covenants, including total funded debt to adjusted EBITDA of not less than 2:1, net worth of not less than $141.8 million, a fixed charge coverage ratio of not less that 1:1, a minimum financial responsibility score of not less than 1.0, and a cohort default rate of not more than 20%. Additionally, the credit agreement contains customary events of default as well as an event of default in the event of the suspension or termination of Title IV Program funding for the Company's and its subsidiaries' schools aggregating 10% or more of the Company's EBITDA (as defined) or its consolidated total assets and such suspension or termination is not cured within a specified period. As of September 30, 2009, the Company was in compliance with the financial covenants contained in the credit agreement.

(b) The Company completed a sale and a leaseback of several facilities on December 28, 2001. The Company retains a continuing involvement in the lease and as a result it is prohibited from utilizing sale-leaseback accounting. Accordingly, the Company has treated this transaction as a finance lease. The lease expiration date is December 31, 2016.

(c) As part of the acquisition of BAR, the Company assumed real estate capital leases related to Americare School of Nursing in St. Petersburg, Florida and Connecticut Culinary Institute in Hartford, Connecticut. These leases bear interest at 8% and expire in 2032 and 2031, respectively.

6. EQUITY

The Company has two stock incentive plans: a Long-Term Incentive Plan (the "LTIP") and a Non-Employee Directors Restricted Stock Plan (the "Non-Employee Directors Plan").

Under the LTIP, certain employees received an award of restricted shares of common stock totaling 200,000 shares, valued at $2.9 million, on October 30, 2007; 80,000 shares, valued at $1.0 million, on February 29, 2008; 8,000 shares, valued at $0.1 million, on May 2, 2008; and 8,000 shares, valued at $0.1 million, on May 5, 2008. As of September 30, 2009, there were a total of 296,000 restricted shares awarded and 59,200 shares vested under the LTIP. The restricted shares vest ratably on the first through fifth anniversary of the grant date; however, there is no vesting period on the right to vote or the right to receive dividends on these restricted shares. The recognized restricted stock expense for the three months ended September 30, 2009 and 2008 was $0.2 million and $0.2 million, respectively, and for the nine months ended September 30, 2009 and 2008 was $0.6 million and $0.6 million, respectively. The unrecognized restricted stock expense under the LTIP as of September 30, 2009 and December 31 2008 was $2.6 million and $3.2 million, respectively.

Pursuant to the Non-Employee Directors Plan, each non-employee director of the Company receives an annual award of restricted shares of common stock on the date of the Company's annual meeting of shareholders. The number of shares granted to each non-employee director is based on the fair market value of a share of common stock on that date. The restricted shares vest ratably on the first through third anniversary of the grant date; however, there is no vesting period on the right to vote or the right to receive dividends on these restricted shares. As of September 30, 2009, there were a total of 104,242 shares awarded and 60,047 shares vested under the Non-Employee Directors Plan. The recognized restricted stock expense for the three months ended September 30, 2009 and 2008 was $0.1 million and $0.1 million, respectively, and for the nine months ended September 30, 2009 and 2008 was $0.2 million and $0.2 million, respectively. The unrecognized restricted stock expense under the Non-Employee Directors Plan as of September 30, 2009 and December 31, 2008 was $0.5 million and $0.4 million, respectively.

In 2009 and 2008, the Company completed a net share settlement for 5,013 and 13,512 restricted shares, respectively, on behalf of some employees that participate in the LTIP upon the vesting of the restricted shares pursuant to the terms of the LTIP. The net share settlement was in connection with income taxes incurred on restricted shares that vested and were transferred to the employee during 2009 and/or 2008, creating taxable income for the employee. The Company has agreed to pay these taxes on behalf of the employees in return for the employee returning an equivalent value of restricted shares to the Company. This transaction resulted in a decrease of approximately $0.1 million and $0.2 million in 2009 and 2008, respectively, to equity on the consolidated balance sheets as the cash payment of the taxes effectively was a repurchase of the restricted shares granted in previous years.

On February 18, 2009, the Company issued 1.15 million shares of common stock in a public offering and received net proceeds of approximately $14.9 million, after deducting underwriting commissions and offering costs of approximately $0.3 million. In addition, in connection with the same public offering, the Company also expensed $1.2 million of costs associated with the sale of stock by certain selling shareholders.

Fair Value of Stock Options

The fair value of the stock options used to compute stock-based compensation is the estimated present value at the date of grant using the Black-Scholes option pricing model. The weighted average fair values of options granted during 2009 were $7.34 per share using the following weighted average assumptions for grants:

	September 30, 2009
Expected volatility	51.95%
Expected dividend yield	0%
Expected life (term)	6 years
Risk-free interest rate	2.29%
Weighted-average exercise price during the year	$14.36

The following is a summary of transactions pertaining to the stock options:

	Shares	Weighted Average Exercise Price Per Share	Weighted Average Remaining Contractual Term	Aggregate intrinsic Value (in thousands)
Outstanding December 31, 2008	1,474,215	$ 9.98	5.25 years	$ 6,808
Granted	27,000	14.36		
Canceled	(21,833)	15.38		
Exercised	(259,929)	6.00		3,224
Outstanding September 30, 2009	1,219,453	10.83	4.79 years	14,798
Exercisable as of September 30, 2009	1,040,039	10.47	4.23 years	13,015

As of September 30, 2009, the unrecognized pre-tax compensation expense for all unvested stock option awards was $0.5 million. This amount will be expensed over the weighted-average period of approximately 1.6 years.

The following table presents a summary of stock options outstanding:

	At September 30, 2009				
	Stock Options Outstanding			Stock Options Exercisable	
Range of Exercise Prices	Shares	Contractual Weighted Average life (years)	Weighted Average Price	Shares	Weighted Exercise Price
$3.10	437,746	2.29	$ 3.10	437,746	$ 3.10
$4.00-$13.99	265,499	7.80	11.88	132,016	11.78
$14.00-$19.99	403,708	5.49	15.17	364,377	15.18

	1,219,453	4.79	10.83	1,040,039	10.47

7. INCOME TAXES

The effective tax rate for the three months ended September 30, 2009 and 2008 was 40.8% and 42.0%, respectively, and for the nine months ended September 30, 2009 and 2008 was 40.3% and 41.7%, respectively.

8. CONTINGENCIES

In the ordinary conduct of its business, the Company is subject to lawsuits, investigations and claims, including, but not limited to, claims involving students or graduates and routine employment matters. Although the Company cannot predict with certainty the ultimate resolution of lawsuits, investigations and claims asserted against it, the Company does not believe that any currently pending legal proceeding to which it is a party will have a material adverse effect on the Company's business, financial condition, results of operations or cash flows.

9. PENSION PLAN

The Company sponsors a noncontributory defined benefit pension plan covering substantially all of the Company's union employees. Benefits are provided based on employees' years of service and earnings. This plan was frozen on December 31, 1994 for non-union employees. The total amount of the Company's contributions paid under its pension plan was $0.7 million and $0 for the nine months ended September 30, 2009 and 2008, respectively. The net periodic benefit cost was $229 thousand and $719 thousand for the three and nine months ended September 30, 2009, respectively. The net periodic benefit cost was $36 thousand and $2 thousand for the three and nine months ended September 30, 2008.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion may contain forward-looking statements regarding us, our business, prospects and our results of operations that are subject to certain risks and uncertainties posed by many factors and events that could cause our actual business, prospects and results of operations to differ materially from those that may be anticipated by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those described in the "Risk Factors" section of our Annual Report on Form 10-K for the year ended December 31, 2008, as filed with the Securities and Exchange Commission ("SEC") and in our other filings with the SEC. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this report. We undertake no obligation to revise any forward-looking statements in order to reflect events or circumstances that may subsequently arise. Readers are urged to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the SEC that advise interested parties of the risks and factors that may affect our business.

The interim financial statements filed on this Form 10-Q and the discussions contained herein should be read in conjunction with the annual financial statements and notes included in our Form 10-K for the year ended December 31, 2008, as filed with the SEC, which includes audited consolidated financial statements for our three fiscal years ended December 31, 2008.

General

We are a leading and diversified provider of career-oriented post-secondary education. We offer recent high school graduates and working adults degree and diploma programs in five areas principal of study: automotive technology, health sciences, skilled trades, business and information technology and hospitality services. Each area of study is specifically designed to appeal to and meet the educational objectives of our student population, while also satisfying the criteria established by industry and employers and state and federal accrediting bodies. We believe that diversification limits our dependence on any one industry for enrollment growth or placement opportunities and broadens our opportunity to introduce new programs. As of September 30, 2009, 31,509 students were enrolled at our 43 campuses across 17 states. Our campuses primarily attract students from their local communities and surrounding areas, although our destination schools attract students from across the United States, and in some cases, from abroad.

Critical Accounting Policies and Estimates

Our discussions of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. On an ongoing basis, we evaluate our estimates and assumptions, including those related to revenue recognition, bad debts, fixed assets, goodwill and other intangible assets, income taxes and certain accruals. Actual results could differ from those estimates. The critical accounting policies discussed herein are not intended to be a comprehensive list of all of our accounting policies. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not result in significant management judgment in the application of such principles. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result from the result derived from the application of our critical accounting policies. We believe that the following accounting policies are most critical to us in that they represent the primary areas where financial information is subject to the application of management's estimates, assumptions and judgment in the preparation of our consolidated financial statements.

Revenue recognition. Revenues are derived primarily from programs taught at our schools. Tuition revenues, textbook sales and one-time fees, such as nonrefundable application fees and course material fees, are recognized on a straight-line basis over the length of the applicable program, which is the period of time from a student's start date through his or her graduation date, including internships or externships that take place prior to graduation. If a student withdraws from a program prior to a specified date, any paid but unearned tuition is refunded. Refunds are calculated and paid in accordance with federal, state and accrediting agency standards. Other revenues, such as tool sales and contract training revenues are recognized as goods are delivered or services are performed. On an individual student basis, tuition earned in excess of cash received is recorded as accounts receivable, and cash received in excess of tuition earned is recorded as unearned tuition.

Allowance for uncollectible accounts. Based upon our experience and judgment or economic trends impacting our business, we establish an allowance for uncollectible accounts with respect to tuition receivables. We use an internal group of collectors, augmented by third-party collectors as deemed appropriate, in our collection efforts. In establishing our allowance for uncollectible accounts, we consider, among other things, a student's status (in-school or out-of-school), whether or not additional financial aid funding will be collected from Title IV Programs or other sources, whether or not a student is currently making payments and overall collection history. Changes in trends in any of these areas may impact the allowance for uncollectible accounts. The receivables balances of withdrawn students with delinquent obligations are reserved based on our collection history. Although we believe that our reserves are adequate, if the financial condition of our students deteriorates, resulting in an impairment of their ability to make payments, additional allowances may be necessary, which will result in increased selling, general and administrative expenses in the period such determination is made.

Our bad debt expense as a percentage of revenues for the three months ended September 30, 2009 and 2008 was 6.8% and 6.3%, respectively, and for the nine months ended September 30, 2009 and 2008 was 6.6% and 5.9%, respectively. Our exposure to changes in our bad debt expense could impact our operations. A 1% increase in our bad debt expense as a percentage of revenues for the three months ended September 30, 2009 and 2008 would have resulted in an increase in bad debt expense of $1.5 million and $1.0 million, respectively, and for the nine months ended September 30, 2009 and 2008 would have resulted in an increase in bad debt expense of $4.0 million and $2.7 million, respectively.

Because a substantial portion of our revenues is derived from Title IV programs, any legislative or regulatory action that significantly reduces the funding available under Title IV programs or the ability of our students or schools to participate in Title IV programs could have a material effect on our ability to realize our receivables.

Goodwill. We test our goodwill for impairment annually, or whenever events or changes in circumstances indicate impairment may have occurred, by comparing the fair value of our reporting units to their carrying value. Impairment may result from, among other things, deterioration in the performance of the acquired business, adverse market conditions, adverse changes in applicable laws or regulations, including changes that restrict the activities of the acquired business, and a variety of other circumstances. If we determine that impairment has occurred, we are required to record a write-down of the carrying value and charge the impairment as an operating expense in the period the determination is made. In evaluating the recoverability of the carrying value of goodwill and other indefinite-lived intangible assets, we must make assumptions regarding estimated future cash flows and other factors to determine the fair value of the acquired assets. Changes in strategy or market conditions could significantly impact these judgments in the future and require an adjustment to the recorded balances.

Goodwill represents a significant portion of our total assets. As of September 30, 2009, goodwill represented approximately $112.0 million, or 30.4%, of our total assets. At December 31, 2008, we tested our goodwill for impairment utilizing a multiple of earnings before interest, taxes, depreciation and amortization (EBITDA) approach to estimate the fair value of our individual reporting units and determined that the fair market value of our reporting units exceeded their carrying amount. No events have occurred subsequently that would have required retesting since that evaluation took place.

Bonus costs. We accrue the estimated cost of our bonus programs using current financial and statistical information as compared to targeted financial achievements and key performance objectives. Although we believe our estimated liability recorded for bonuses is reasonable, actual results could differ and require adjustment of the recorded balance.

Effect of Inflation

Inflation has not had a material effect on our operations.

Results of Operations

Certain reported amounts in our analysis have been rounded for presentation purposes.

The following table sets forth selected consolidated statements of operations data as a percentage of revenues for each of the periods indicated:

Three Months Ended September 30, 2009 Compared to Three Months Ended September 30, 2008

Revenues. Revenues increased by $47.9 million, or 47.7%, to $148.4 million for the quarter ended September 30, 2009 from $100.5 million for the quarter ended September 30, 2008. Approximately $14.6 million, or 30.4%, of this increase was a result of our acquisitions of Briarwood College on December 1, 2008, six of the seven schools comprising Baran Institute of Technology (“BAR”) on January 20, 2009 and Clemens College (“Clemens”) on April 20, 2009 (collectively, the “Acquisitions”). The remainder of the increase in revenues was primarily attributable to a 28.0% increase in average student population, which increased to 26,460 for the quarter ended September 30, 2009 from 20,665 for the quarter ended September 30, 2008. Average revenue per student on a same school basis increased 4.0% for the quarter ended September 30, 2009 from the quarter ended September 30, 2008 primarily from tuition increases which ranged from 3% to 5% annually and by a shift from lower to higher tuition programs. For a general discussion of trends in our student enrollment, see “Seasonality and Trends” below.

Educational services and facilities expenses. Our educational services and facilities expenses increased by $16.1 million, or 38.7%, to $57.7 million for the quarter ended September 30, 2009 from $41.6 million for the quarter ended September 30, 2008. The Acquisitions accounted for $8.8 million, or 54.4%, of this increase. The remainder of the increase in educational services and facilities expenses was primarily due to instructional expenses which increased by $4.9 million, or 24.3%, and books and tools expenses, which increased by $2.1 million, or 27.5%, respectively, over the same quarter in 2008. These increases were attributable to a 19.5% increase in student starts for the third quarter of 2009 as compared to the third quarter of 2008 coupled with a 28.0% increase in average student population and higher tool sales during the third quarter of 2009 compared to the third quarter of 2008. On a same school basis, we began the third quarter of 2009 with approximately 5,400 more students than we had on July 1, 2008, and as of September 30, 2009 our student population on a same school basis was approximately 5,700 higher than as of September 30, 2008. Also contributing to the increase in educational services and facilities expenses were higher facilities expenses, which increased by approximately $0.4 million over the same quarter in 2008. This increase was primarily due to an increase in depreciation expense of $0.2 million resulting from capital expenditures and higher repairs and maintenance expense at our campuses. Educational services and facilities expenses as a percentage of revenues decreased to 38.9% for the third quarter of 2009 from 41.4% for the second quarter of 2008.

Selling, general and administrative expenses. Our selling, general and administrative expenses for the quarter ended September 30, 2009 were $66.6 million, an increase of $18.1 million, or 37.3%, from $48.5 million for the quarter ended September 30, 2008. Approximately $8.2 million, or 45.3%, of this increase was attributable to the Acquisitions. The remainder of the increase in our selling, general and administrative expenses for the quarter ended September 30, 2009 was primarily due to: (a) a $0.8 million, or 19.2%, increase in student services; (b) a $1.7 million, or 9.3%, increase in sales and marketing; and (c) a $7.4 million, or 28.5%, increase in administrative expenses as compared to the quarter ended September 30, 2008.

The increase in student services during the third quarter of 2009 as compared to the third quarter of 2008 was primarily due to annual increases in compensation and benefit expenses to our financial aid and career services personnel. Additionally, during 2009, we increased the number of financial aid and career services personnel as a result of a larger student population during the third quarter of 2009 as compared to the third quarter of 2008 and to further assist our students’ opportunities during these difficult times.

The increase in sales and marketing expense during the third quarter of 2009 as compared to the third quarter of 2008 was primarily due to: (a) annual compensation increases to sales representatives; (b) additional sales representatives to facilitate our recent and anticipated growth; and (c) increased call center support as compared to the third quarter of 2008. In addition, we continued to invest in marketing initiatives in an effort to continue to grow our student population.

The increase in administrative expenses during the third quarter of 2009 as compared to the third quarter of 2008 was primarily due to: (a) a $3.5 million increase in personnel costs relating to (i) annual compensation increases and an increase in the number of personnel needed to serve the needs of a higher student population during the quarter ended September 30, 2009 as compared to the third quarter of 2008, (ii) an increase in accruals for incentive compensation and cost of benefits provided to employees; (b) a $3.0 million increase in bad debt expense; (c) $0.5 million of legal costs; and (d) a net increase of $0.4 million incurred in connection with the sale of stock by our largest shareholder on September 30, 2009 compared to the expenses incurred in the same period of 2008 in connection with the S-3 registration statement filing. As a percentage of revenues, selling, general and administrative expenses for the third quarter of 2009 decreased to 44.8% from 48.3% for the third quarter of 2008.

For the quarter ended September 30, 2009, including the Acquisitions, our bad debt expense as a percentage of revenue was 6.8% as compared to 6.3% for the same quarter in 2008. This increase was primarily attributable to higher accounts receivable due to a 28.0% increase in average student population and a 47.7% increase in revenue for the third quarter of 2009 as compared to the third quarter of 2008. Additionally, during 2009 we considered the current economic environment which has produced high unemployment rates and decided to increase our reserve on graduate receivables to 17% from 10% in 2008. This is offset by a decrease in the number of days sales outstanding as of September 30, 2009 to 24.4 days, compared to 26.3 days as of September 30, 2008. This decrease was primarily attributable to our efforts in centralizing the back office administration of our financial aid department in an effort to improve the effectiveness and timeliness of our financial aid processing. As of September 30, 2009, we had outstanding loan commitments to our students of $25.3 million as compared to $24.6 million at June 30, 2009 and $24.8 million at December 31, 2008. Loan commitments, net of interest that would be due on the loans through maturity, were $17.6 million at September 30, 2009 as compared to $17.0 million at June 30, 2009 and $17.0 million at December 31, 2008.

Net interest expense. Our net interest expense for the quarter ended September 30, 2009 was $1.1 million, an increase of $0.6 million from $0.5 million for the quarter ended September 30, 2008. This increase was attributable to real estate capital leases assumed in connection with the Acquisitions.

Income taxes. Our provision for income taxes for the quarter ended September 30, 2009 was $9.4 million, or 40.8% of pretax income, compared to $4.1 million, or 42.0% of pretax income for the quarter ended September 30, 2008. The decrease in our effective tax rate for the quarter ended September 30, 2009 was primarily attributable to a change in the mix in state taxable income among various states.

Nine Months Ended September 30, 2009 Compared to Nine Months Ended September 30, 2008

Revenues. Revenues increased by $125.5 million, or 46.6%, to $395.1 million for the nine months ended September 30, 2009 from $269.6 million for the nine months ended September 30, 2008. The Acquisitions accounted for approximately $39.5 million, or 31.5%, of this increase. The remainder of the increase in revenues was primarily attributable to a 26.5% increase in average student population, which increased to 24,311 for the nine months ended September 30, 2009 from 19,221 for the nine months ended September 30, 2008. Average revenue per student on a same school basis increased 4.3% for the nine months ended September 30, 2009 from the nine months ended September 30, 2008 primarily from tuition increases which ranged from 3% to 5% annually and by a shift in student population from lower to higher tuition programs. For a general discussion of trends in our student enrollment, see “Seasonality and Trends” below.

Educational services and facilities expenses. Our educational services and facilities expenses increased by $43.0 million, or 37.6%, to $157.1 million for the nine months ended September 30, 2009 from $114.1 million for the nine months ended September 30, 2008. The Acquisitions accounted for $23.4 million, or 54.4%, of this increase. The remainder of the increase in educational services and facilities expenses was primarily due to instructional expenses which increased by $11.7 million, or 19.9%, and books and tools expenses, which increased by $6.0 million, or 37.4%, respectively, over the same period in 2008. These increases were attributable to a 27.1% increase in student starts for the nine months ended September 30, 2009 as compared to the same period in 2008 coupled with a 26.5% increase in average student population and higher tool sales during the nine months ended September 30, 2009 compared to the same period in 2008. On a same school basis, we began 2009 with approximately 3,000 more students than we had on January 1, 2008, and as of September 30, 2009, our population on a same school basis was approximately 5,700 higher than as of September 30, 2008. Also contributing to the increase in educational services and facilities expenses were higher facilities expenses, which increased by approximately $1.9 million over the same period in 2008. This increase was primarily attributable to: (a) a $0.6 million increase in rent expense resulting from the expansion of our Melrose Park, Illinois and Vine Street, Ohio campuses, our new campus in Toledo, Ohio and lease extensions at our existing campuses; (b) a $0.7 million increase in repairs and maintenance costs due to overall higher common area charges as well as charges relating to our lease expansions and new locations; and (c) a $0.4 million increase in real-estate taxes due to additional campus space as well as annual property value and tax rate increases. Educational services and facilities expenses as a percentage of revenues decreased to 39.8% from 42.3% for the nine months ended September 30, 2009 compared to the same period in 2008.

Selling, general and administrative expenses. Our selling, general and administrative expenses for the nine months ended September 30, 2009 were $189.7 million, an increase of $48.7 million, or 34.5%, from $141.1 million for the quarter ended September 30, 2008. Approximately $22.0 million, or 45.2%, of this increase was attributable to the Acquisitions. The remainder of the increase in our selling, general and administrative expenses for the quarter ended September 30, 2009 was primarily due to: (a) a $2.0 million, or 16.6%, increase in student services; (b) a $4.6 million, or 8.6%, increase in sales and marketing; and (c) a $20.0 million, or 26.6%, increase in administrative expenses as compared to the same period in 2008.

The increase in student services during the nine months ended September 30, 2009 as compared to the same period in 2008 was primarily due to annual increases in compensation and benefit expenses to our financial aid and career services personnel. Additionally, during 2009, we increased the number of financial aid and career services personnel as a result of a larger student population during the nine months ended September 30, 2009 as compared to the same period in 2008 and to further assist our students' opportunities during these difficult economic times.

The increase in sales and marketing expense during the nine months ended September 30, 2009 as compared to the same period in 2008 was primarily due to: (a) annual compensation increases to sales representatives; (b) additional sales representatives to facilitate our recent and anticipated growth; and (c) increased call center support as compared to the same period in 2008. In addition, we continued to invest in marketing initiatives in an effort to continue to grow our student population.

The increase in administrative expenses during the nine months ended September 30, 2009 as compared to the same period in 2008 was primarily due to: (a) a $8.1 million increase in personnel costs relating to (i) annual compensation increases and an increase in the number of personnel needed to serve the needs of a higher student population during the nine months ended September 30, 2009 as compared to the same period in 2008, (ii) an increase in accruals for incentive compensation and increased cost of benefits provided to employees; (b) a $7.4 million increase in bad debt expense; (c) $1.0 million of legal costs; (d) a $0.2 million increase in software maintenance expenses resulting from increased software licenses for our student management system; (e) $0.3 million incurred due to the re-branding of our Florida Culinary Institute in West Palm Beach, Florida; (f) $1.4 million in connection with our acquisition of BAR on January 20, 2009; (g) a net increase of $0.2 million incurred in connection with the sale of stock by our largest shareholder on September 30, 2009 and our public offering on February 18, 2009 compared to the expenses incurred in the same period of 2008 in connection with the S-3 registration statement filing; and (h) $0.6 million related to repairs and maintenance of equipment and general administrative supplies. As a percentage of revenues, selling, general and administrative expenses for the nine months ended September 30, 2009 decreased to 48.0% from 52.3% for the same period in 2008.

For the nine months ended September 30, 2009, including the Acquisitions, our bad debt expense as a percentage of revenue was 6.6% as compared to 5.9% for the same period in 2008. This increase was primarily attributable to higher accounts receivable due to a 26.5% increase in average student population and a 46.6% increase in revenue for the nine months ended September 30, 2009 as compared to the same period in 2008. Additionally, during 2009 we considered the current economic environment which has produced high unemployment rates and decided to increase our reserve on graduate receivables to 17% from 10% in 2008. This is offset by a decrease in the number of days sales outstanding at September 30, 2009 to 27.2 days, compared to 29.2 days at September 30, 2008. This decrease was primarily attributable to efforts in centralizing the back office administration of our financial aid department in an effort to improve the effectiveness and timeliness of our financial aid processing.

Net interest expense. Our net interest expense for the nine months ended September 30, 2009 was $3.2 million, an increase of $1.6 million, from $1.6 million for the same period in 2008. This increase was attributable to real estate capital leases assumed in connection with the Acquisitions.

Income taxes. Our provision for income taxes for the nine months ended September 30, 2009 was $18.2 million, or 40.3% of pretax income, compared to $5.3 million, or 41.7% of pretax income for the same period in 2008. The decrease in our effective tax rate for the nine months ended September 30, 2009 was primarily attributable to a change in the mix in state taxable income among various states.

Liquidity and Capital Resources

Our primary capital requirements are for facility expansion and maintenance, acquisitions and the development of new programs. Our principal sources of liquidity have been cash provided by operating activities and borrowings under our credit agreement.

The following chart summarizes the principal elements of our cash flows:

	Nine Months Ended September 30,	
	2009	2008
	(In thousands)	
Net cash provided by operating activities	$ 42,865	$ 30,003
Net cash used in investing activities	$ (36,038)	$ (15,919)
Net cash provided by (used in) financing activities	$ 15,995	$ (11,441)

At September 30, 2009, we had $38.1 million in cash and cash equivalents, representing an increase of approximately $22.8 million as compared to $15.2 million as of December 31, 2008. Historically, we have financed our operating activities and organic growth primarily through cash generated from operations. We have financed acquisitions primarily through borrowings under our credit agreement and cash generated from operations. During the first nine months of 2009, we borrowed $44.0 million to finance our acquisition of BAR and to finance our working capital needs and subsequently repaid all borrowings. We currently anticipate that we will be able to meet both our short-term cash needs, as well as our need to fund operations and meet our obligations beyond the next twelve months with cash generated by operations, existing cash balances and, if necessary, borrowings under our credit agreement. In February 2009, we sold common stock in a public offering and received net proceeds of approximately $14.9 million. The proceeds of this offering were used to repay borrowings under our credit agreement. In addition, we may also consider accessing the financial markets in the future as a source of liquidity for capital requirements, acquisitions and general corporate purposes to the extent such requirements are not satisfied by cash on hand, borrowings under our credit agreement or operating cash flows. However, we cannot assure you that we will be able to raise additional capital on favorable terms, if at all. At September 30, 2009, we had net borrowings available under our $100 million credit agreement of approximately $94.4 million, including a $14.4 million sub-limit on letters of credit. The credit agreement terminates on February 15, 2010. We intend to refinance our credit agreement prior to the maturity date; however, we cannot assure you that we will be able to do so or that any refinancing would be on terms favorable to us.

Our primary source of cash is tuition collected from our students. The majority of students enrolled at our schools rely on funds received under various government-sponsored student financial aid programs to pay a substantial portion of their tuition and other education-related expenses. The largest of these programs are Title IV Programs which represented approximately 79% of our cash receipts relating to revenues in 2008. Students must apply for a new loan for each academic period. Federal regulations dictate the timing of disbursements of funds under Title IV Programs and loan funds are generally provided by lenders in two disbursements for each academic year. The first disbursement is usually received approximately 31 days after the start of a student's academic year and the second disbursement is typically received at the beginning of the sixteenth week from the start of the student's academic year. Certain types of grants and other funding are not subject to a 30-day delay. Our programs range from 14 to 102 weeks. In certain instances, if a student withdraws from a program prior to a specified date, any paid but unearned tuition or prorated Title IV financial aid is refunded according to state and federal regulations.

As a result of the significance of the Title IV funds received by our students, we are highly dependent on these funds to operate our business. Any reduction in the level of Title IV funds that our students are eligible to receive or any impact on our ability to be able to receive Title IV funds would have a significant impact on our operations and our financial condition. See “Risk Factors” in Item 1A, included in our Annual Report on Form 10-K for the year ended December 31, 2008.

Cash Flow Operating Activities

Net cash provided by operating activities was $42.9 million for the nine months ended September 30, 2009 compared to $30.0 million for the nine months ended September 30, 2008. The $12.9 million increase in net cash provided by operating activities was primarily due to an increase in net income of approximately $19.5 million and an increase in other working capital items offset by $15.2 million of higher tax payments during the nine months ended September 30, 2009 as compared to the nine months ended September 30, 2008.

Cash Flow Investing Activities

Net cash used in investing activities increased by $20.1 million to $36.0 million for the nine months ended September 30, 2009 from $15.9 million for the nine months ended September 30, 2008. This increase was primarily attributable to a $27.6 million increase in cash used towards the BAR and Clemens acquisitions offset by a $7.0 million decrease in capital expenditures for the quarter ended September 30, 2009 as compared to the same quarter of 2008. Our capital expenditures primarily resulted from facility expansion, leasehold improvements, and investments in classroom and shop technology.

Capital expenditures are expected to continue to increase in the remainder of 2009 as we upgrade and expand current equipment and facilities or open new facilities to meet increased student enrollments. We anticipate capital expenditures to approximate 5% of revenues in 2009 and expect to fund these capital expenditures with cash generated from operating activities and, if necessary, with borrowings under our credit agreement.

Cash Flow Financing Activities

Net cash provided by financing activities was $16.0 million for the nine months ended September 30, 2009, as compared to net cash used in financing activities of $11.4 million for the nine months ended September 30, 2008. This increase of $27.4 million was primarily due to: (a) $14.9 million received from our sale of common stock in a public offering during the nine months ended September 30, 2009 as compared to $6.4 million in repurchases of our common stock during the nine months ended September 30, 2008; (b) a $5.0 million decrease in net payments on borrowings under our credit agreement; (c) $1.5 million increase in proceeds from the exercise of stock options; and (d) offset by $0.8 increase in capital lease payments.

Under the terms of our credit agreement, a lending syndicate provided us with a $100 million credit facility for a term of five years which terminates on February 15, 2010. The credit agreement permits the issuance of letters of credit of up to $20 million, the amount of which reduces the availability of permitted borrowings under the agreement.

The following table sets forth our long-term debt (in thousands):

	September 30, 2009	December 31, 2008
Finance obligation	$ 9,672	$ 9,672
Note payable	43	-
Capital lease-property (with a rate of 8.0%)	27,260	-
Capital leases-equipment (with a rate of 8.5%)	403	502
Subtotal	37,378	10,174
Less current maturities	(391)	(130)
Total long-term debt	$ 36,987	$ 10,044

See Note 5 to our unaudited condensed consolidated financial statements for more information regarding our long term debt and lease obligations.

Contractual Obligations

Long-term Debt. As of September 30, 2009, our long term debt consisted of the finance obligation in connection with our sale-leaseback transaction in 2001, note payable, and amounts due under capital lease obligations.

Lease Commitments. We lease offices, educational facilities and equipment for varying periods through the year 2030 at base annual rentals (excluding taxes, insurance, and other expenses under certain leases).

The following table contains supplemental information regarding our total contractual obligations as of September 30, 2009, measured from the end of our fiscal year, December 31, 2008 (in thousands):

	Payments Due by Period				
	Total	Less than 1 year	2-3 years	4-5 years	After 5 years
Capital leases (including interest)	$ 60,876	$ 2,419	$ 5,207	$ 5,083	$ 48,167
Notes payable (including interest)	43	43	-	-	-
Operating leases	195,413	21,101	42,248	39,105	92,959
Rent on finance obligation	10,337	1,426	2,852	2,852	3,207
Total contractual cash obligations	$ 266,669	$ 24,989	$ 50,307	$ 47,040	$ 144,333

Off-Balance Sheet Arrangements

We had no off-balance sheet arrangements as of September 30, 2009, except for our letters of credit of $5.6 million which are primarily comprised of letters of credit for the DOE and security deposits in connection with certain of our real estate leases. These off-balance sheet arrangements do not adversely impact our liquidity or capital resources.

Seasonality and Trends

Our net revenues and operating results normally fluctuate as a result of seasonal variations in our business, principally due to changes in total student population. Student population varies as a result of new student enrollments, graduations and student attrition. Historically, our schools have had lower student populations in our first and second quarters and we have experienced large class starts in the third and fourth quarters and student attrition in the first half of the year. Our second half growth is largely dependent on a successful high school recruiting season. We recruit our high school students several months ahead of their scheduled start dates, and thus, while we have visibility on the number of students who have expressed interest in attending our schools, we cannot predict with certainty the actual number of new student enrollments and the related impact on revenue. Our expenses, however, do not vary significantly over the course of the year with changes in our student population and net revenues. During the first half of the year, we make significant investments in marketing, staff, programs and facilities to ensure that we meet our second half of the year targets and, as a result, such expenses do not fluctuate significantly on a quarterly basis. To the extent new student enrollments, and related revenues, in the second half of the year fall short of our estimates, our operating results could suffer. We expect quarterly fluctuations in operating results to continue as a result of seasonal enrollment patterns. Such patterns may change as a result of new school openings, new program introductions, and increased enrollments of adult students and/or acquisitions.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to certain market risks as part of our on-going business operations. We have a credit agreement with a syndicate of banks. Our obligations under the credit agreement are secured by a lien on substantially all of our assets and our subsidiaries and any assets that we or our subsidiaries may acquire in the future, including a pledge of substantially all of our subsidiaries' common stock. Outstanding borrowings bear interest at the rate of adjusted LIBOR plus 1.0% to 1.75%, as defined, or a base rate (as defined in the credit agreement). As of September 30, 2009, we had no outstanding borrowings under our credit agreement.

Our interest rate risk is associated with miscellaneous capital equipment leases and notes payable, which are not significant.

Item 4. CONTROLS AND PROCEDURES

(a) *Evaluation of disclosure controls and procedures.* Our Chief Executive Officer and Chief Financial Officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Securities Exchange Act Rule 13a-15(e)) as of the end of the quarterly period covered by this report, have concluded that our disclosure controls and procedures are adequate and effective to reasonably ensure that material information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by Securities and Exchange Commissions' Rules and Forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

(b) *Changes in Internal Control Over Financial Reporting.* There were no changes made during our most recently completed fiscal quarter in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

In the ordinary conduct of our business, we are subject to lawsuits, investigations and claims, including, but not limited to, claims involving students or graduates and routine employment matters. Although we cannot predict with certainty the ultimate resolution of lawsuits, investigations and claims asserted against us, we do not believe that any currently pending legal proceeding to which we are a party will have a material adverse effect on our business or financial condition, results of operations or cash flows.

Item 1A. RISK FACTORS

Part 1, Item 1A, "Risk Factors," of our Annual Report on Form 10-K includes a detailed discussion of our risk factors. The information presented below updates, and should be read in conjunction with, the risk factors and information disclosed in our Annual Report on Form 10-K and subsequent quarterly and current reports filed with the SEC. The risks described in this report and in our Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us, or that we currently deem to be immaterial, also may materially adversely affect our business, financial condition, prospects and future results.

A protracted economic slowdown and rising unemployment could harm our business if our students are unable to obtain employment upon completion of their programs, are unable to repay student loans or elect not to pursue education with us.

We believe that many students pursue postsecondary education to be more competitive in the job market. However, the current economic recession has adversely affected job markets and a protracted economic slowdown could further increase unemployment and diminish job prospects and placement rates. Our placement rates declined in 2008 compared to 2007, and further diminished job prospects and placement rates and heightened financial worries could affect the willingness of students to incur loans to pay for postsecondary education and to pursue postsecondary education in general. As a result, our enrollment and operating performance could suffer. The recent weakness in the job markets could also affect the prospects for long-term job growth, and there can be no assurance that the growth projected by the U.S. Bureau of Labor Statistics through 2016 will materialize.

In addition, many of our students borrow Title IV loans to pay for tuition, fees and other expenses. A protracted economic slowdown could negatively impact our students' ability to repay those loans which could negatively impact the cohort default rates of our institutions. Our 2006 cohort default rates at our institutions, including Briarwood and the Baran schools, as reported by the DOE range from 5.8% to 19.3%. Our 2007 cohort default rates as reported by the DOE range from 0% to 22.9%, and were higher than the 2006 cohort default rates for most of our schools, and the weakness in the economy could continue to increase default rates. For information regarding the historical default rates for our schools, see "Business—Regulatory Environment—Federal Family Education Loan Program" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2008. An increase in our cohort default rates in excess of specified levels could cause our institutions to lose their eligibility to participate in some or all Title IV Programs which could have a material adverse effect on our operations. See "Risk Factors—Risks Related to Our Industry—Our institutions would lose eligibility to participate in Title IV Programs if their former students defaulted on repayment of their federal student loans in excess of specified levels, which could reduce our student population and revenues" in our Annual Report on Form 10-K for the year ended December 31, 2008.

Our failure to comply with regulations promulgated by the DOE could result in financial penalties, or the limitation, suspension, or termination of our continued participation in the Title IV programs.

The issues addressed in the regulations that have been or are expected to be proposed by the DOE, as well as the issues to be addressed in the upcoming negotiated rulemaking process, which are described under "Recent Developments—Regulation" in our Current Report on Form 8-K that we filed on September 21, 2009, are broad and complex and concern a number of significant aspects of the Title IV programs, including eligibility and certification, administrative capability, school-lender relationships, the 90/10 rule, incentive compensation and student loan default rates. At this time, we cannot be certain whether and to what extent any changes may affect our ability to remain eligible to participate in the Title IV programs or require us to incur additional costs in connection with our administration of the Title IV programs. Any future changes that jeopardize our eligibility to participate in some or all of the Title IV programs could materially adversely affect us. Failure of an institution to comply with new or existing DOE regulations could result in sanctions, including loss of eligibility to participate in Title IV programs; requirement to repay Title IV funds and related costs to the DOE and lenders; transfer of the institution to the heightened cash monitoring level two method of payment or to the reimbursement method of payment, which would adversely affect the timing of the institution's receipt of Title IV funds; requirement to post a letter of credit in favor of the DOE as a condition for continued Title IV certification; requirement to provide timely information regarding certain oversight and financial events; proceedings to impose a fine or to limit, suspend or terminate the institution's participation in Title IV programs; an emergency action to suspend the institution's participation in Title IV programs without prior notice or a prior opportunity for a hearing; denial or refusal to consider an institution's application for renewal of its certification to participate in Title IV programs; or referral of a matter for possible civil or criminal investigation.

Our regulatory environment and our reputation may be negatively influenced by the actions of other postsecondary institutions.

In recent years, regulatory investigations and civil litigation have been commenced against several postsecondary educational institutions. These investigations and lawsuits have alleged, among other things, deceptive trade practices and non-compliance with DOE regulations. These allegations have attracted adverse media coverage and have been the subject of federal and state legislative hearings. Although the media, regulatory and legislative focus has been primarily on the allegations made against these specific companies, broader allegations against the overall postsecondary sector may negatively impact public perceptions of postsecondary educational institutions, including us. Such allegations could result in increased scrutiny and regulation by the DOE, U.S. Congress, accrediting bodies, state legislatures or other governmental authorities on all postsecondary institutions, including us.

System disruptions to our technology infrastructure could impact our ability to generate revenue and could damage the reputation of our institutions.

The performance and reliability of our technology infrastructure is critical to our reputation and to our ability to attract and retain students. We license the software and related hosting and maintenance services for our online platform and our student information system from third-party software providers. Any system error or failure, or a sudden and significant increase in bandwidth usage, could result in the unavailability of systems to us or our students. Any such system disruptions could impact our ability to generate revenue and affect our ability to access information about our students and could also damage the reputation of our institutions.

A decline in the overall growth of enrollment in postsecondary institutions, or in our core disciplines or in the number of students seeking degrees online, could cause us to experience lower enrollment at our schools, which could negatively impact our future growth.

According to a March 2009 report from the NCES, enrollment in degree-granting, postsecondary institutions is projected to grow 10.0% over the ten-year period ending fall 2017 to approximately 20.1 million. This growth is slower than the 25.8% increase reported in the prior ten-year period ended in fall 2007, when enrollment increased from 14.5 million in 1997 to 18.2 million in 2007. Similarly, a 2008 study by Eduventures, LLC, projects a compound annual growth rate of 12.5% in online postsecondary education enrollment over the five-year period ending fall 2013, which represents an aggregate increase in online enrollment of 1.5 million. This growth is slower than the 25.3% compound annual growth rate in the prior five-year period ending fall 2008, which represented an aggregate increase in online enrollment of 1.3 million. In addition, according to a March 2008 report from the Western Interstate Commission for Higher Education, the number of high school graduates that are eligible to enroll in degree-granting, postsecondary institutions is expected to peak at approximately 3.3 million for the class of 2008, falling in the period between 2007–08 and 2013–14 by about 150,000 in total before resuming a growth pattern for the foreseeable future thereafter. Although, as of September 30, 2009, only 22% of our students were enrolled in degree granting programs (primarily at the associate's degree level), our strategy is to expand our degree granting offerings. In order to increase our current growth rates in degree granting programs, we will need to attract a larger percentage of students in existing markets and expand our markets by creating new academic programs. In addition, if job growth in the fields related to our core disciplines is weaker than expected, as a result of any regional or national economic downturn or otherwise, fewer students may seek the types of diploma or degree granting programs that we offer and seek to offer. Our failure to attract new students, or the decisions by prospective students to seek diploma or degree programs in other disciplines, would have an adverse impact on our future growth.

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting;

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
